Summary

Software engineer with 8+ years of experience building real-time 3D applications, VR training systems, and full-stack platforms for defense and commercial clients. Shipped Unity SDKs, multiplayer XR applications, and mission-critical web systems across Air Force and private sector environments. Actively transitioning into AI engineering — pursuing a Bachelor's in Artificial Intelligence with a focus on machine learning and intelligent systems development. Previous Top Secret clearance holder eligible for renewal, offering a significantly faster reinstatement process than clearing a new candidate. Willing to relocate for the right opportunity. Open to remote or hybrid roles in software engineering, XR, defense tech, or AI development.

Skills

Unity Development • C# Programming • Full-Stack Development • API Integration • Git Version Control • Agile Application Design • Software Lifecycle Management • Code Collaboration

Experience

Software Engineer 04/2022 – Current

Dynepic, Inc – Remote

- Developed Unity SDKs to streamline training application creation and enhance digital asset integration.
- Created multiplayer applications showcasing advanced platform features, like mixed reality asset streaming.
- Engineered applications for VR device authentication, facilitating direct and secured access to training materials.
- Presented live demos to effectively showcase features and train users on application capabilities.
- Optimized VR gameplay experiences tailored to diverse user skill levels.
- Implemented software lifecycle principles such as Git collaboration, testing, and code releases via NPM.

Software Developer 03/2020 – 04/2022

United States Air Force – Hill AFB, UT

- Engineered training modules for Air Force personnel.
- Developed virtual reality applications using Unity and C#.
- Trained incoming Airmen in object-oriented design and 3D application development.
- Created modular code designed to integrate with various applications and scenarios.

Operations Programmer 02/2017 – 03/2020

United States Air Force – Fort Meade, MD

- Full-stack web development using PHP, HTML5, CSS, JavaScript, jQuery, MySQL, and Bootstrap.
- Communicated with users and customers to derive requirements and create deadlines.
- Designed end-to-end user experience to improve efficiency for users.
- Engineered platform with an emphasis on extracting analytical data to improve mission capabilities.

Education and Training

Pursuing Bachelor's, Artificial Intelligence

Grand Canyon University – Phoenix, AZ (Online) | December 2025 - Present

Associate's Degree, Computer Science

Community College of the Air Force – Montgomery, AL | January 2019
