Summary

Innovative software engineer specializing in full-stack development and 3D application. Skilled in Unity, C#, and JavaScript, with a proven track record of building scalable, user-focused solutions. Highly adaptable team player with strong problem-solving abilities, dedicated to delivering high-quality software products.

Skills

- Unity development
- C# programming
- Agile application design
- Software lifecycle management
- Code collaboration
- Full-stack development
- Git version control
- API integration

Experience

Software Engineer, 04/2022 — Current

Dynepic, Inc — Remote

- Developed Unity SDKs to streamline training application creation and enhance digital asset integration.
- Created multiplayer applications showcasing advanced platform features, like mixed reality asset streaming.
- Engineered applications for VR device authentication, facilitating direct and secured access to training materials.
- Presented live demos to effectively showcase features and train users on application capabilities.
- Optimized VR gameplay experiences tailored to diverse user skill levels.
- Implemented software lifecycle principles such as Git collaboration, testing, and code releases via NPM.

Software Developer, 03/2020 — 04/2022

United States Air Force — Hill AFB, UT

- Engineered training modules for Air Force personnel.
- Developed virtual reality applications using Unity and C#.
- Trained incoming Airmen in object-oriented design and 3D application development.
- Created modular code designed to integrate with various applications and scenarios.

Operations Programmer, 02/2017 — 03/2020

United States Air Force — Fort Meade, MD

- Full-stack web development using PHP, HTML5, CSS, JavaScript, jQuery, MySQL, and Bootstrap.
- Communicated with users and customers to derive requirements and create deadlines.
- Designed end-to-end user experience to improve efficiency for users.
- Engineered platform with an emphasis on extracting analytical data to improve mission capabilities.

Education and Training

01/2019 Community College of The Air Force — Montgomery, AL

Associate's Degree Computer Science
